

School Improvement Plan Summary

Urrbrae Agricultural High School

Goals	Targets	Challenge of Practice	Success Criteria
Goal 1: Increase student achievement across each learning area focusing on differentiated/explicit teaching strategies.	Target 2022: <ul style="list-style-type: none"> 95% (180 Year 10 students will achieve a C or higher I all learning areas with 70% (133 students) achieving an A Or B Grade. 20 Year 7-10 ATSI students will achieve 90% of their grades at a C or Higher across all learning areas. 	If teachers make learning intentions and success criteria transparent to students and demonstrate them by modelling, differentiating for the range of student ability within their individual classes, student achievement should increase across each learning area ensuring consistency across the site. (Hattie, 2009).	<ul style="list-style-type: none"> Students will utilise the stated learning intentions of every class to achieve success. Student grades across all learning areas (including ATSI students) will reflect an improvement in A and B grades, and a reduction in D and E grades
	2023 <ul style="list-style-type: none"> To be populated at the end of 2022 		
	2024: <ul style="list-style-type: none"> To be populated at the end of 2023 		
Goal 2: Increase student achievement in numeracy across the school.	2022: <ul style="list-style-type: none"> 95% of students in Years 7-10 (760 students) will achieve a C Grade or higher in mathematics in their semester 2 report. 95 % of Stage 1 & 2 students studying mathematics (285 students) will achieve a C- or higher in their end of year results 15% of Year 9 students (30 students) will achieve in the high bands for NAPLAN Numeracy (Bands 9&10) in 2022. 	If we embed researched-informed approaches and numeracy skills into mathematics teaching and learning practices, and all faculties integrate mathematics and numeracy skills across the curriculum, we will achieve higher student achievement in numeracy. Collaborative practices used to ensure consistency in quality and standard of teaching and assessment, and using data and feedback to inform planning and actions will further support this achievement.	<ul style="list-style-type: none"> Students will demonstrate a comprehensive understanding of numeracy by achieving at a C or higher in Mathematics from Years 7-12. Increased number of students choosing higher level mathematics subjects at stage 1 & 2. Students can successfully apply appropriate numeracy skills in a range of contexts.
	2023 <ul style="list-style-type: none"> To be populated at the end of 2022 		
	2024: <ul style="list-style-type: none"> To be populated at the end of 2023 		
Goal 3: Increase student achievement in writing	2022: <ul style="list-style-type: none"> At least 50% of students (6 students) who achieved a D or E grade in Year 10 English in 2021 will achieve a C or higher in Stage 1 English. Year 7-10 ATSI students (14 students) will show an 85% achievement rate in English at a C or higher at the end of semester 2. 15% of Year 9 students (30 students) will achieve in the high bands for NAPLAN Writing (Bands 9&10) in 2022 	If we use a cross-curricular approach to the teaching of writing we will increase student achievement in writing. Specifically, if each subject teacher focuses on the forms, meta-language, subject specific vocabulary and genres relevant to their areas, students will develop the skills and strategies necessary for success. Careful scaffolding and modelling of best practice, along with editing opportunities, will build self-growth.	<ul style="list-style-type: none"> Students can articulate an awareness of the importance of form, purpose and audience for their writing. Students will demonstrate the ability to self-edit and use teacher feedback to improve on their own writing, showing evidence of growth from first draft to final product in all learning areas. Students will demonstrate accuracy of expression and punctuation in their writing, no matter what the genre or learning area.
	2023: <ul style="list-style-type: none"> To be populated at the end of 2022 		
	2024 <ul style="list-style-type: none"> To be populated at the end of 2023
